About The BOOK

Indian Financial System and Capital Market are made up of several institutions, markets, rules and legislation, customs, money managers, analysts, transactions, and liabilities. Money may be lent and borrowed easily thanks to the financial system. The insurance, banking, capital markets, and numerous service sectors of India's financial system are all under the jurisdiction of independent authorities. The capital market is a growth engine for the economy. The capital market's many institutions facilitate efficient resource allocation by guiding the flow of money in both quantitative and qualitative terms. The value of stocks and securities is stabilized by a well-developed capital market that includes both banking and non-banking intermediaries staffed by knowledgeable professionals. Important topics and in-depth discussions of the Indian Financial System also include its components, its activities, the role of the money market in the economy, the creation and distribution of information, as well as the country's capital market. This book provides an in-depth look at the Indian financial system and is well-written.
