Abstract

The National Assessment and Accreditation Council (NAAC) suggested that as a post-accreditation quality sustenance mechanism, each accredited institution should create an internal quality assurance cell (IQAC). The IQAC will assist the institution in accomplishing the objectives of academic excellence and providing excellent higher education in India because quality improvement is a continual process. Its main goal is to create a system for the institution's performance to improve consciously, consistently, and catalytically as well as to significantly and meaningfully contribute to the institution's improvement in both academic and administrative performance. The IQAC must guarantee that everything done in the institution "Education" is done effectively, efficiently, and in accordance with self-declared criteria, without any errors of any type. In order to collect data and information using probes on various parameters, the IQAC must establish methods and modalities. Therefore, the IQAC ought to develop into a tool for ensuring quality. This paper mainly focused on makes an effort to examine how and in what ways the IQAC operates and contributes to quality in the overall development of institutions of higher education. It also seeks to identify the role of the IQAC in terms of quality assurance, sustaining in regard to all the core components, and will list some observations about how the IQAC functions in colleges.

Keywords: Quality culture, rural institutions, IQAC, stakeholder, quality cultivation, NAAC.

Introduction

Higher education quality is the primary focus of policy formulation, and as a result, it is now required that Higher Education Institutions (HEIs) obtain accreditation from the National Assessment and Accreditation Council (NAAC). To restore quality, all colleges have established the Internal Quality Assurance Cell (IQAC). Long-term quality standards are being pushed through the development of Internal Quality Assurance Cells (IQAC) in institutions after the first cycle. Since improving quality is a never-ending process, the IQAC will merge with the institutions and work to improve quality and guarantee quality education. The establishment of the functioning of the IQAC would be made easier by the NAAC's well-defined rules and guidelines.
