Hon'ble Chairman's Message

At a point in time where all teaching, competitions, felicitations and basically every student- teacher interaction depended on a screen, our teaching faculty has played a commendable role in imparting an enriched and engaging learning experience to the students. Their greatest challenge was to recreate the classroom atmosphere for the lab-attending students even as they learnt within the confinement of their homes,

all the while, making the students feel that nothing much was lost from their curricular contents. Having a team of experienced and knowledgeable professors promoted the overall development of the students through innovative methods and also helped unlock their hidden potentials. We witness a time in the history of education where parents, teachers and students had to work in unison to create a conducive learning bubble. The role of the cooperative parents and the unfailing professors stands amplified and deeply appreciated. Gratitude resonates in every milestone that we have reached thus far.

- Prof. Dr. A.K. Natesan
