Food laws and standards

The course has been designed to acquaint with the national and international food laws. The course is meant for all the stakeholders of the food chain i.e. producer, processor, transporter, processor, distributor, retailer, exporter/importer and legislator. The country took a revolutionary step in Food Safety and Quality with the new scientific based food laws and standards designated as Food Safety and Standard Act 2006 followed by its Rules and Regulations, 2011. The continuous improvement in enforcement and their harmonization with Codex standards have laid the foundations and templates for safe and hygienic food.

The course has four major components: Indian Food Regulatory Regime; Global Scenario; Export and Import Laws and Regulations; and Other Laws and Standards Related to Foods.

The Indian Food Regulatory Regime covers the salient features of New Act Food safety and Standard Act, 2006 and its Regulations, 2011. The Global Scenario deals with international standards setting bodies like Codex Alimentarius Commission and WHO. Introduction to the subject features

KOMARAPALAYAM - 637303**Types of Fire extinguishers**

There are 5 main fire extinguisher types – Water, Foam, Dry Powder, CO₂ and Wet Chemical.

You should have the right extinguishers for your premises, or you may not meet current regulations.

Along with ensuring you have the right types of fire extinguisher, you will also need to make sure that you select the right sizes and weights. Read more about the current UK extinguisher regulations.

The various types of fire extinguisher put out fires started with different types of fuel – these are called 'classes' of fire. The fire risk from the different classes of fire in your business premises will determine which fire extinguisher types you need.

Whilst there are 5 main types of fire extinguisher, there are different versions of both the Water and Dry Powder extinguishers, meaning there are a total of 8 fire extinguisher types to choose from. The 8 types of fire extinguisher are: –

- Water
- Water Mist
- Water Spray
- Foam
- Dry Powder – Standard
- Dry Powder – Specialist
- Carbon Dioxide ('CO₂')
- Wet Chemical

There is no one extinguisher type which works on all classes of fire.

Below is a summary of the classes of fire, and a quick reference chart showing which types of extinguisher should be used on each. We then provide a detailed explanation of each type of fire extinguisher below

Classes of fire

There are six classes of fire: Class A, Class B, Class C, Class D, 'Electrical', and Class F. –

- Class A fires – combustible materials: caused by flammable solids, such as wood, paper, and fabric
- Class B fires – flammable liquids: such as petrol, turpentine or paint
- Class C fires – flammable gases: like hydrogen, butane or methane
- Class D fires – combustible metals: chemicals such as magnesium, aluminium or potassium
- Electrical fires – electrical equipment: once the electrical item is removed, the fire changes class
- Class F fires – cooking oils: typically a chip-pan fire

Which extinguisher is used for each class of fire? – quick guide

Type Extinguisher	Fire	CLASS A	CLASS B	CLASS C	CLASS D	Electrical	CLASS F	Comments
		Combustible materials (e.g. paper & wood)	Flammable liquids (e.g. paint & petrol)	Flammable gases (e.g. butane and methane)	Flammable metals (e.g. lithium & potassium)	Electrical equipment (e.g. computers & generators)	Deep fat fryers (e.g. chip pans)	
Water		✓	✗	✗	✗	✗	✗	Do not use on liquid or electric fires
Foam		✓	✓	✗	✗	✗	✗	Not suited to domestic use
Dry Powder		✓	✓	✓	✓	✓	✗	Can be used safely up to 1000 volts
CO2		✗	✓	✗	✗	✓	✗	Safe on both high and low voltage
Wet Chemical		✓	✗	✗	✗	✗	✓	Use on extremely high temperatures

Water Extinguishers

Water fire extinguisher - a type of extinguisher

Overview:

Water fire extinguishers are the most common extinguisher type for class A fire risk. Most premises will require either water or foam extinguishers.

Label Colour:

– Bright Red

Use for:

- Organic materials such as:
 - o Paper and cardboard
 - o Fabrics and textiles
 - o Wood and coal

Do not use for:

- Fires involving electrical equipment
- Kitchen fires
- Flammable gas and liquids
