"**The Future of Artificial Intelligence**" Artificial Intelligence (AI) is a revolutionary field of computer science, which is ready to become the main component of various emerging technologies like **big data, robotics, and IoT**. It will continue to act as a technological innovator in the coming years. In just a few years, AI has become a reality from fantasy. Machines that help humans with intelligence are not just in sci-fi movies but also in the real world. At this time, we live in a world of Artificial Intelligence that was just a story though for some years.
