## SUMMARY REPORT

This is to inform that, Excel Engineering College, Department of Computer Science and Engineering conducted **“ARTIFICIAL INTELLIGENCE IMPACT ON CYBER SECURITY AND ITS FUTURE TRENDS”** on 29.10.2022, all students attended the programme and gained knowledge.

The Session was more interested and interactive, students asked many questions regarding the presentation and get cleared their doubts. AI is going to play a huge role in cyber security in the future. The more the amount of data generates the ever-growing number of cyber threats will be there. Due to this, it is becoming increasingly difficult for humans to keep up.

AI enables cyber security systems to process those new threats quickly and because AI systems continually learn, they are being trained to detect malware, run pattern recognition and detect even the minutest behaviors that could indicate malware or ransom ware, before it enters the system.

## SUMMARY REPORT

This is to inform that, Excel Engineering College, Department of Computer Science and Engineering conducted **“INTRODUCTION TO CUTTING EDGE TECHNOLOGY - CLOUD COMPUTING”** on 17.09.2022, all students and faculty members attended the programme and gained.

The Session was more interested and interactive, students asked many questions regarding the presentation and get cleared their doubts. Cutting-edge technology refers to technological devices, techniques or achievements that employ the most current and high-level IT developments; in other words, technology at the frontiers of knowledge. Leading and innovative IT industry organizations are often referred to as "cutting edge."

The ability to democratize technology and put it in the hands of anyone who needs it will allow smaller companies to be creative and innovative in ways that are going to change the game across many industries.

Cutting edge is an adjective used to describe the newest, most advanced version of a product or service. The phrase cutting edge has a positive connotation and can be contrasted with the phrase bleeding edge, which has a negative connotation.

## SUMMARY REPORT

This is to inform that, Excel Engineering College, Department of Computer Science and Engineering conducted “**DESIGNING WEB APPLICATION USING RUBY-RAILS**” presentation on (24.09.2022)., all students and faculty members attended the programme and gained knowledge about the web Application using Ruby-Rails.

The Session was more interested and interactive, students asked many questions regarding the presentation and get cleared their doubts. “Ruby on Rails” is one of the most powerful and popular web development frameworks.

Ruby on Rails is a perfect web application framework for businesses of every size. It helps to save both time and money on the development process compared to other potential options. It also offers a straightforward programming paradigm and gives developers a great deal of flexibility. Ruby runs on a server, not on the client (like JavaScript), so you need a server to run a Ruby Web application.
