### PROGRAMME REPORT

Students' Expostulation and Debate

on

**"Effect of Artificial Intelligence on Job Opportunities"**

Date & Time: 27/05/2024 at 10 am

Venue: Hyundai Professional Training Center

Number of Participants: 50 students

On 27/05/2024 the LEO CLUB conducted a students' expostulation and Debate on "Effect of Artificial Intelligence on Job Opportunities". The program started with the invocation followed by the welcome address by Dr.M.Kathiresan, Professor and Head of the Department of Mechanical Engineering. This is some important highlights regarding the debate and discussion on the job opportunities for mechanical engineers in the field of Artificial Intelligence.

Artificial intelligence offers great promise to drive businesses forward, automate manufacturing processes, and deliver valuable insights. AI is increasingly being used across various industries, including logistics, manufacturing, and cybersecurity. Small businesses have also made rapid progress in creating speech recognition software for mobile devices.

To stay ahead in the era of artificial intelligence, it is essential to embrace lifelong learning, develop soft skills, be agile, and specialize in a particular area. By developing these skills and adapting to the changing job market, workers can thrive in the era of AI and take advantage of the opportunities it presents
